

## IN-SIGHT 2000 SERIES VISION SENSORS

In-Sight® 2000 series vision sensors combine the power of an In-Sight vision system with the simplicity and affordability of a vision sensor. Ideal for solving error-proofing applications, these vision sensors set new standards for value, ease of use and flexibility thanks to a powerful combination of proven In-Sight vision tools, a simple setup, and a modular design featuring field changable lighting and optics.

### Powerfully simple and affordable vision sensors

#### Unmatched flexibility

Field interchangeable lighting and optics make it easy to adapt to virtually any production line environment.

#### Powerful integrated light

Diffuse illumination technology enables robust vision inspection in the most challenging environments—without the need for costly external lighting.

#### The simple set up of EasyBuilder

Ease-of-use is built into the heart of the In-Sight 2000 series starting with powerful vision tools and an In-Sight Explorer software interface that makes set up simple and assures a seamlessly reliable communications link to other factory automation equipment.

## Three In-Sight 2000 models

All In-Sight 2000 series vision sensors offer easy application development with the step-by-step EasyBuilder interface. The In-Sight 2000-110 and In-Sight 2000-120 models offer Pass/Fail inspection capabilities. The In-Sight 2000-130 model features a significantly expanded range of location, pixel counting, brightness, contrast, measurement and counting vision tools.
